

MAMMOGRAM PREP

SCREENING MAMMOGRAMS: No perfume, powder, lotion or deodorant above waist, in the under arm or breast area prior to the exam.

*Please note: Schedule your mammogram at least a year and a day after your previous mammogram. Most insurance companies will only cover a screening mammogram once every 366 days. Please check with your insurance if you have any questions regarding your coverage.

If you have any questions about the prep for your procedure, please contact the Pratt Healthcare Imaging Department at 540-785-7200.
